

I benefit from listening to XM Satellite Radio and its traffic and weather channels. The local channels only play the traffic and weather when it is good for them. With XM it is on constantly like the weather channel on cable or satellite tv. Satellite radio provides variety and quality that are not available elsewhere. They play the music that me and my family want to hear 24 hours a day, not a few songs a day like the local stations. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
